“I only expected this product to resist invertebrate fouling for up to 18 months, and yet it continues to perform after five years! No other anti-fouling treatment I have tested under static testing conditions in the tropics to date has achieved anything close to the performance of MARELCO Suricle™”.

Dr Ashley Coutts, Managing Director, Biofouling Solutions Pty Ltd.

Dr Ashley Coutts, Managing Director, Biofouling Solutions Pty Ltd. has over 20 years of experience in biofouling and invasive aquatic species (IAS) management, Dr. Ashley Coutts is a recognized leader in the industry. Beginning his career at the Australian Maritime College, he has conducted extensive research on the nature and impact of biofouling across various vessel types. Dr. Coutts has tested numerous biofouling and IAS treatment technologies and has overseen more than 1,200 vessel inspections globally. He is also a representative of the International Maritime Organization (IMO), contributing his expertise to global biofouling management policies. Today, as the founder of Biofouling Solutions Pty Ltd, Dr. Coutts helps regulators and the maritime industry effectively manage the risks associated with biofouling and IAS
